

# CA ARCserve® Backup r12

CA ARCSERVE BACKUP R12 OFFERS WORLD-CLASS DATA PROTECTION FOR DISTRIBUTED SERVERS, DATABASES AND APPLICATIONS, AS WELL AS CLIENTS FOR MULTIPLE ENVIRONMENTS, INCLUDING WINDOWS, UNIX, LINUX AND NETWARE. WITH ITS WIDE RANGE OF POWERFUL, EASY-TO-USE AND SINGLE MANAGEMENT DATA PROTECTION TOOLS, CA ARCSERVE BACKUP ENSURES THE INTEGRITY AND AVAILABILITY OF YOUR MOST IMPORTANT ASSET—DATA.

## Challenges

In recent years, keeping business data secure has become a highly critical task due to multiple factors:

- Information is growing at exponential rates.
- New regulations require keeping all information safe for longer periods of time.
- Increased risk of potential disasters.

## Solution

CA ARCserve Backup r12 delivers the most comprehensive data protection available today. It provides centralized control and advanced features designed to address your changing business needs. This high performance solution combines innovative D2D2T (disk-to-disk-to tape) backup with powerful, integrated anti-virus and encryption tools, making it one of the most secure out-of-the-box backup solutions offered.

## Benefits

CA ARCserve Backup r12 ensures all data created is available and ready to recover in case of a disaster, reducing cost and complexity. What's more, CA ARCserve Backup also helps:

- Improve security
- Mitigate business risk
- Improve asset utilization
- Deliver greater control
- Provide greater protection

## Key Differentiators

- Centralized management capabilities allow you to organize, monitor and configure your backup environment through a single interface resulting in greater manageability and helping save time and resources
- Disaster recovery (DR) testing validates the recoverability from the DR site to ensure you are able to recover successfully
- Simplified pricing reduces the complexity of procurement, installation, and the management of software product licensing keys, thereby saving time and money

---

## New Features

**CENTRALIZED MANAGEMENT AND ADMINISTRATION** Allows administrators to manage, modify and control backup and restore jobs, media devices, activity logs, alerts, catalogs, product licensing and reports from a single point including local, remote servers and remote offices.

**HIGH PERFORMANCE BACKUP AND RESTORE** Leverages multiple methods, including backup to disk, backup to tape, disk to disk to tape, VTL Support, VSS Snapshot support, Hardware Snapshot support, multiplexing and multi-streaming among others, to provide high-performance, non-disruptive backup and restore operations to mission-critical information and data assets.

**IMPROVED DISASTER RECOVERY SECURITY** Supports FIPS certified AES 256 Bit encryption and hardware-based tape drive encryption to provide you with a safe and secure method to protect the information that will reside outside the company for disaster recovery purposes.

**VMWARE ESX SUPPORT** With a new agent for VMware, backups can be managed efficiently by selecting a combination of VCB Proxy, ESX Server, Virtual Machine and Volumes.

**ENHANCED DISASTER RECOVERY OPTION** An enhanced graphical user interface allows you to easily customize server and hardware parameters before performing disaster recovery. It also supports 64-bit Windows platforms.

**NEW REPORTS FOR PROACTIVE MANAGEMENT** Provides you with actionable information allowing you to optimize your current backup jobs, as well as discover issues before they occur.

**NEW LICENSING MANAGEMENT CONSOLE** Automatically detects all licenses in your environment and allows you to perform a central licensing implementation of all CA ARCserve Backup components from a single console. Additionally, you can add, change or remove components in your environment.

**REMOTE BRANCH OFFICE PROTECTION** Integrates with CA XOsoft™ Replication enabling you to consolidate your backups from multiple remote branch office locations onto a secure central backup server. This capability allows for tape-less remote branch offices and helps customers mitigate risk of data loss during transport and associated cost.
